Statemanet

Hello! I am a software engineer. I have been involved in this field since 14 years, I have a deep understanding of software engineering paradigms. My knowledge in this field includes in-depth knowledge of Rust, Go, Elixir, Python and C programming languages as well as Memory management, Networking, Threading and Operating systems. I mainly use C and Go. I will constantly follow and study the news. I mostly learn new programming languages and do small projects. Currently I am working on AI (Computer vision and NLP) I also like to discover new things and new interests and these new things help me to be innovative in my projects and give maximum results.

What is my goal

The reason for my being in this field is primarily my great interest in all of this and the goal: to say a new word in my profession. In today's situation, I think that every new discovery will make it easier for people to improve their quality of life.

What am i looking for

A job where I can show my abilities as much as possible and get something new.

Professional Experience

Software Engineer   **2022 - 2023**
Octarinox, Tbilisi, Georgia

Wiring Diagrams: Developed and interpreted wiring diagrams to support hardware-software integration.

Project Planning & Research: Conducted comprehensive project planning and research to drive informed decision-making and strategic development.

Programming Languages: C/C++, Python

Skills

- C/C++
- Rust
- Go
- JS/TS
- Deep understanding of operating systems, memory management, threading and networking
- Linux API programming
- Software Design and Architecture
- Docker
- Git
